A	11				
Actinomycete	11	CH ₄	16	Feedstock	23
Aerated Static Pile	11	Cleanfill	16	Fermentation	23
Aeration	11	Clinical and Related Waste	17	Fertiliser Value	23
Aerobic	11	CO ₂	17	Food Organics (Compostable Organics)	23
AGO	11	Co-composting	17	Food Soiled Paper Products (Food Organics)	23
Agricultural Organics	11	Collection	17	Food waste (see Food organics)	23
Air-filled Porosity	11	Commercial & Industrial Waste	17	Forced Aeration	23
Air Pressure Loss	11	Composite Wood	17	Fruit and Vegetable (Food Organics)	23
Ambient Air Temperature	11	Compost	17	Fungus	24
Amendment	11	Compost Pile	17	G	25
Ammonia (NH ₃)	11	Compost Recipe	17	Garden Organics	25
Ammonium (NH ₄ ⁺)	11	Compost Stability	17	Garden Waste (see Garden Organics)	25
Anaerobic	11	Compost tea	17	Generation Rate	25
Anaerobic Digestion	11	Compostable Organics	17	Global Warming Potential (GWP)	25
Animal (residuals)	12	Compostable Wood	18	Greenhouse Gases (GHG)	25
Anion	12	Composted Fine Mulch	18	Green Manures	25
Anthropogenic	12	Composted Mulch	18	General Purpose Soil	25
ANZECC	12	Composted Soil Conditioner	18	Grease trap waste	25
Application rate	12	Composting	18	Green Organics	25
AS 3743 (Australian Standard AS 3743—1996)	12	Composting Amendment	18	Green Waste (see garden organics)	25
AS 4419 (Australian Standard AS 4419—1998)	12	Composting (System)	18	Grinding	25
AS/NZS 4422 (Australian Standard/New Zealand Standard AS 4422—1996)	12	Construction & Demolition Waste	18	GWP	25
AS 4454 (Australian Standard AS 4454—1999)	13	Contamination (generic)	18	H	26
Aspergillus fumigatus	13	Contamination (composting)	18	Harvest	26
Audit	13	Cost benefit analysis	18	Hazardous Waste	26
Australian Greenhouse Office (AGO)	13	Critical control point	18	Heat-Trapping Potential	26
Australian Standard	13	Curing	18	Heavy Metals	26
Australian Waste Database (AWD)	13	Cytotoxin	18	Herbicides	26
Availability, Nutrient	13	Cytotoxic Waste	19	Humic Acids	26
Avoidance	13	D	20	Humus	26
B	14	Dairy Material (Food Organics)	20	Hydrogen Sulfide (H ₂ S)	26
Bacteria	14	Damping Off Disease	20	Hydrophobic Soils	26
Batch	14	Decomposers	20	Hyphae	26
Batch Mixer	14	Decomposition	20	I	27
Best Practice	14	Degradability	20	Immobilisation, Nitrogen	27
Biochemical Oxygen Demand (BOD)	14	Denitrification	20	Industrial Waste	27
Biodegradable	14	Demand forecast	20	Incompatible Wastes	27
Biofertiliser	14	Density	20	Induced aeration	27
Biofuels	14	Development consent	20	Infiltration	27
Biogas	14	Digestion	20	Inoculum	27
Biogenic	14	Disposal	20	Integrated Waste Management	27
Biomass	14	Domestic Waste	20	Intensive Agriculture	27
Bioremediation	15	Drop-Off Recycling	20	In-vessel (Composting)	27
Biosolids	15	Dry Matter	20	In-vessel (General)	27
Bread, Pastry and Flour (Food Organics)	15	E	21	J	28
Bulk Density	15	EcoRecycle Victoria	21	K	29
Bulking Agent	15	Ecotoxic	21	K (potassium)	29
C	16	Effluent	21	Kerbside Collection	29
C (Carbon)	16	Electrical Conductivity (EC)	21	Kerbside Recycling	29
C&D Waste	16	Environment	21	L	30
C&I Waste	16	Environment Australia	21	Land Application	30
Carbohydrate	16	Environmental Impact Assessment (EIA)	21	Land Rehabilitation	30
Carbon Dioxide (CO ₂)	16	Environmental Impact Statement (EIS)	21	Landfill site	30
Carbon to Nitrogen Ratio (C:N ratio)	16	Environmental Management Plan (EIS)	22	Landscaping Industry	30
Carbon Sequestration	16	Environmentally Significant Transformations	22	Large-scale on-site system	30
Carrying Capacity	16	Enzymes	22	Leachate	30
Catalyst	16	Evaporative Cooling	22	Life Cycle	30
Cation	16	Exchange Capacity	22	Life Cycle Analysis (LCA)	30
Cation Exchange Capacity (CEC)	16	Extended Pile	22	Lignin	30
Cellulose	16	Extended Producer Responsibility	22	Lime Stabilisation	30
Chemical Oxygen Demand (COD)	16	Extensive Agriculture	22	Lime Stabilised Products	30
Chemical Persistence	16	F	23	Litter	30
Chemical Waste (Clinical and Related Waste)	16	Facility	23	Loose Fill Material	30
		Fasteners (wood and timber)	23	Low Density Soil	31
		Fat and Oil Materials (Food Organics)	23	M	32
				Manure	32
				Market	32
				Marketing plan	32
				Market research	32

Material (broad definition)	32	Putrescible Garden Organics	38	Vermiculture	46
Material Description	32	Pythium	38	Vectors	46
Materials Recovery Facility (MRF)	32	Q	39	W	47
Material Description Subcategory	32	Quality	39	Waste Audit	47
Maturation	32	Quality Assurance	39	Waste Categorisation System	47
Maturity (of compost)	32	Quality Management System	39	Waste Characterisation	47
Meat and Poultry Materials (Food Organics)	32	Quality Policy	39	Waste Classification System	47
Mechanical Biological Treatment (MBT)	32	R	40	Waste Minimisation	47
Metabolism	32	Raw Material (see compostable organic material)	40	Waste Reduction	47
Methane	32	Raw Mulch	40	Waste Stream	47
Mesophilic	32	Raw Product	40	Waste-to-energy	47
Mid-scale On-site System	32	Recalcitrant (Food Organics)	40	Water-holding Capacity (Soil)	47
Mobile Garbage Bin (MGB)	33	Recyclable	40	Waterlogged	47
Mineralisation	33	Recycled Content	40	Water-repellent Soils	47
Moisture Content	33	Recycled Organics	40	Windrow with or Without Aeration	47
MSW	33	Recycled Organics Industry	40	Wood and Timber (Compostable Organics)	47
Mulch	33	Recycled Organics Products	40	Wood waste (see wood and timber)	48
Multiple Unit Dwelling (MUD)	33	Recycle/Recycling	40	Woody Garden Organics (Garden Organics)	48
Municipal Solid Waste (MSW)	33	Refuse Derived Fuel	40	Work Instructions	48
Mycelium	33	Rehabilitation	41	X	49
N	34	Renewable Resource	41	Y	50
N	34	Reprocessing	41	Z	51
Natural Soil	34	Residual Solid Waste	41		
Nitrate-nitrogen	34	Resource Recovery	41		
Nitrification	34	Reuse	41		
Nitrogen Drawdown Index	34	Risk Management	41		
Nitrous Oxide	34	Saline Soil	41		
N ₂ O	34	Salinity	41		
Non-renewable resources	34	Sample	41		
Non-woody Garden Organics	34	Saturation Extract	41		
Noxious weed	34	Sawdust	41		
Nutrient Availability	34	Seafood (Food Organics)	41		
Nutrient Pollution	34	Screening	42		
O	35	Secondary resources	42		
Odour	35	Sharps	42		
Off-cuts	35	Shredding	42		
On-farm Composting	35	Site plan	42		
On-site	35	Sludges	42		
On-site, Large-Scale System	35	Soil Blend	42		
On-site, Mid-Scale System	35	Soil Conditioner	42		
On-site Soil	35	Soil Structure	42		
Organic Matter	35	Soil Texture	42		
Organic Soil	35	SOP	42		
P	36	Source Separation	42		
P (phosphorus)	36	Specification	42		
Pad, Composting	36	Spontaneous Combustion	42		
Passive Aeration	36	Stability (of Compost)	42		
Passively Aerated Windrow	36	Sterilisation	42		
Pasteurisation	36	Sterilised Product	43		
Pasteurised Fine Mulch	36	Stock food	43		
Pasteurised Mulch	36	Stock Mortalities	43		
Pasteurised Product	36	Structure, of a Composting Mix or Raw Material	43		
Pasteurised Soil Conditioner	36	Stump and Rootball Materials (Garden Organics)	43		
Pathogens	36	T	44		
PCBs	36	Texture, of a Composting Mix or Raw Material	44		
Peat	36	Thermophilic	44		
Perlite	37	Top Dressing	44		
pH	37	Topsoil	44		
Phytophthora	37	Transfer Station	44		
Phytotoxic	37	Treated Timber (Wood and Timber)	44		
Plastic	37	Trees and Limbs (Garden Organics)	44		
Potting Mix	37	Trial	44		
Precautionary Principle	37	Turned Pile	44		
Procedure	37	Turning	44		
Process Control	37	U	45		
Processing	37	Untreated Timber (Wood and Timber)	45		
Processing Capacity	37	Urban Amenity	45		
Processing Time	37	V	46		
Product (see Recycled Organics)	37	Vermicast	46		
Product Application Guidelines	37	Vermiculite	46		
Product Specification	37				
Product Standard	37				
Putrescible Waste	37
